269 million students. Still signing a sheet of paper.

The founder's story

Full deck →

The person selling it is the person who built it.

CEO

sells it

CTO

built it
(me again, actually.)

Adeyemi Abdul Basit Adetunji, 21

My story

She is #252.
And #4.
And #98.

Ten sheets go round.
Each numbers her
differently.

Up to nine tonnes of paper, to answer a question twice a week.

1.2–1.8m

sheets: one university, five sessions

Zero

the moment the register moves here

Ten sheets or a million collapse into one tap.

Enrol
once, known everywhere

Open
a class, six digits

Tap
matched in a second

Derive
marks, warnings

Watch the demo

Built and validated.
Not yet deployed.

No proxies
in class or exam

No network?
still recording

10 Days
on one charge

Marks
calculated for you

+15 more features, all working today.

3D See it in 3D

They sell a door lock. We sell the register.

	Terminal	A-Kiosk
Enrol	✗ at every machine	✓ once, everywhere
Collect	✗ USB stick, nightly	✓ sends itself
Grade	✗ by hand, term end	✓ live, all term
Power cut	✗ it stops	✓ 10 days, still on
A university	✗ doesn’t know one	✓ courses to exams

Attendance and Nigeria are where we start. Neither is the size of the prize.

A year, at $4.44 a student

One small fee.
They already pay it.

$2.01 spent on paper, a student a year

$2.22 our fee, for a live register

Billed on the invoice the school already issues.

We do not sell machines.

No margin on the kiosk. We earn on the fee.

day 0

Day 30

paid back,
cost split 50/50

Day 98

paid back even
if we give it free

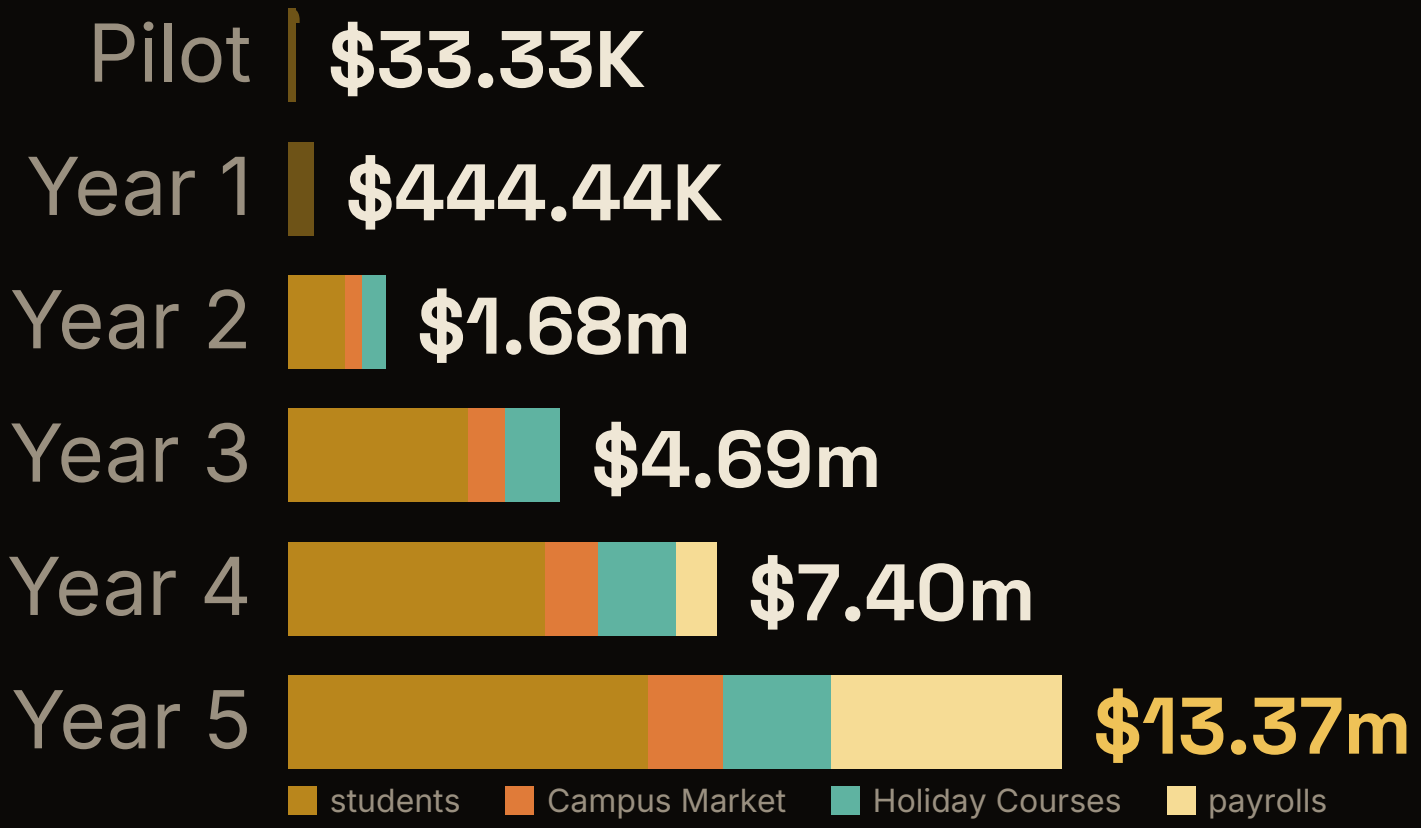

$536,000. The pre-seed round.

Team	$140K	Hardware	$120K
Marketing	$80K	Offices	$70K
Product	$60K	Legal & patent	$45K
Contingency	$21K		

82.92% of the raise, returned by year one alone

The fee phases. The students grow. **Both at once.**

$27.61m
revenue across the plan

Σ Model

From one hall to every student.

		STUDENTS
Month 3	Lead City pilot	15K
Month 18	Holiday Courses launch fee to ~~₦4,500~~ ($3.33)	200K
Year 2	Campus Market + AI study tools; revenue funds growth	300K
Year 3.5	Payrolls workplace licences & contracts	
Year 5	Campus meets work graduates hired on their record	1.4M

Why now. Why me.

68 / 70
an A needed 70;
the register went missing

1.5 / 2.5
hours I had for
a 2.5-hour exam

So I built the fix.

Read my story

The kiosk is built.
The first hall is waiting.

$536K puts A-Kiosk in its first building.

"Paper registers cost me an A.
So I built the fix."
